Shifting the consulting world to be mindful in delivering excellence

Business Process Redesign, Change Management, Operational Improvements

Inteligenca uses business process redesign to examine the efficiency and effectiveness of your company's most critical processes. This enables your company to deliver the highest-quality of service, in the most productive way, at the most competitive cost and time to output.

*Business Process Redesign * Change Management * Operational Improvements*

Business Process Redesign (BPR)

We work with you to prioritize key processes based on the value at stake, and develop a view of the current state based on operational data, using detailed process maps and analysis to help identify major gaps. We then work together with a cross-functional client team to define a series of principles that will guide the solution generation phase, and create a vision of the future state of each process from the ground up, along with the roadmap to achieve the near and long term results.

Change Management

Inteligenca's approach to Change Management eliminates risks and shapes the outcomes of change by identifying and supporting the people, processes, and technologies that must be involved in each transition. Our ability to deliver what is needed for success across all areas of operation ensures that moving from the current state to the future state is smooth, successful, and achieves lasting benefits.

We coach organizations on how to successfully implement organizational changes, business strategy changes, technology changes, process changes, or project scope changes, at all different levels. We prepare your organization for changes by doing planning sessions, developing a comprehensive communication plan, creating training strategies, and leading future-state design and implementation sessions.

Operational Improvements

Our business operations consulting experts will collaborate with your company to achieve operational excellence. They will help you reinvent your operations to unlock growth, lower costs and unleash your strategy. By helping you Identify, realize and sustain savings opportunities across all spend categories and procurement areas, and coaching your team how to consistently deliver the customer promise at the right cost across service channels; all that will make a big difference in how you run your business.
